The origin of the MORs (Mortal Oscillatory Rates or " Mortality Oscillator Rates" of bacteria and viruses), originally discovered by Royal Rife during the first half of the twentieth century, has perplexed many people since that time. While it is generally acknowledged that some type of resonance phenomenon destroyed or debilitated the organisms, it has been difficult at best to pinpoint any association of specific frequency with what is physically affecting these life forms during the time of their debilitation or demise.

#### TREATMENT UTILIZING FREQUENCIES

We have searched the net, and found many lists that many practitioners have put together

and others have added through their experiences

How to use the list

Do you want to check to see if others have used or discovered frequencies for similar ailments

Go Here

click on the link above or Go Here when you arrive at the web page click on " Edit" in the top left hand corner of your browser, then click on "Find", enter your ailment and hit "find next", this will show you a number of frequencies, write them down or cut and paste to your note pad, then click on "find next" do this until the

"finished searching the document" sign pops up...

If you have our Rife Crane system

USE AT YOUR OWN RISK, NO CLAIMS ARE MADE FOR EFFECTIVENESS.

304 - Sedation or pain relief, also nice to use as the last frequency of a set of frequencies

432, 484, 610, 690, 790 and 864 - Lyme disease - Please note the use of these frequencies

has produced what is known as a Herxheimer Reaction. As the spirochetes die, they release

a protein toxin that can produce joint pains, weakness, and general malaise for a few days

following exposure. It has been suggested that one start slow with but a minute of exposure

and then gradually increase the exposure time. One should not repeat an exposure until all

effects and symptoms of the previous exposure have cleared.

676 - *Helicobacterium Pylori* - linked as a causative agent in stomach ulcers.

728 - A type of Cancer cell found in blood of people with Multiple Myeloma. Causes the

cells to disintegrate according to one researcher.

728, 800, 880 , 7760, 8000, 8250 - Flu virus

2050, 2180, 2452 - Non responsive to Cancer at 2128 or 2008. It has been suggested that

these Cancers are formed in response to some different stimulus than commonly occurs.

664, 764 - very beneficial for emotional ties to diseases. 664 has apparently caused people to giggle especially in a group exposure setting.

660, 728, 787 Epstein Barr virus also has been used for Mononucleosis.

1234, 3672, 7344 Opens bronchioles makes breathing easier seems to be helpful for asthmatics. Also is quite sedating. 7344 seems to work best of the three.

350, 360 Sharpens eyesight

1489, 1500, 1550, 2489 Herpes - relieves acute outbreak, but does not remove dormant

form from body. Use of 2489 for about 30 minutes seems to provide long term benefits.

470 - stopped involuntary tremors in left hand of a person with multiple sclerosis.

463 and 466 stopped involuntary tremors in a person with brain tumors.

915 and 918 plantar wart - use long exposure time - 15 to 30 minutes on each frequency.

2050 and 2250 used to correct chronic prostatitis - 10 to 15 minutes on each frequency. Use

for a short interval will aggravate prostatitis!

3.6 and 6.3 Hz have been reported as being able to keep a person from becoming angry

72, 95, 190, 304 - Used for nausea and abdominal cramping

866, 430, 2213, 620 Chlamydia infections.

6000 - A master Central Nervous System Frequency. Release of emotional problems, blocked seizures - but does nothing once seizure starts, stopped tremors in hands in person

with Parkinson's disease.

Hepatitis C - used by a Dr. in France to good effect. Exposures were of only 45 seconds on

each frequency. Longer exposures had no effect. 728, 166, 224, 317, 727, 787, 880, 2189

Multiple Sclerosis - Use of 5000 Hz for 30 minutes every other day, used the above Hep C

protocol on alternate days. So one day 5000, next day Hep C. One should start the 5000 at

about 10 minutes and work up in time slowly watching for detox reactions.

Psoriasis - From New Zealand comes this protocol 2180, 2128, 2008, 1552, 880, 784, 664, 304

Systemic Lupus Erythematosus (SLE) - the above sequence for psoriasis has been used on

one person with a severe active case of SLE with beneficial results.

Fruit Flies - 2167Hz reported by someone in the Netherlands

Chronic Fatigue Syndrome - 2127 , 465, 660, 666, 727, 787, 880, 1550. Also used parasite frequencies

Round Worms - 104, 332, 422, 721, 942, 3212, 240, 688, 20, 120

Flukes - 143, 275, 676, 763, 524, 854, 945, 651, 435, 524

Relieves the need to worry - very handy at times. - 6130Hz

Basal Cell Skin Carcinoma - 2116, 760, 2280 direct exposure of the lesion to light from the

tube helps as does pulsing the audio output. About 30 minutes exposures at 2116 seemed

optimal, 760 and 2280 at 5 minutes each.

Lists of frequencies. Last part is 132 col format.

Use non-proportional font to display so the columns

line up, if desired. The first list in this file

are frequencies from James Bare. These should be considered the most reliable (the non-theoretical ones, anyway).

My limited use of the Garvey frequencies indicate they may be useful, especially since there are specific ones for maladies, which can be used by the common, typical ones.
